

BIO CONTROL F.O.T.

Microbiological Control Agent for Use in Lube Oil and Fuel Oil Systems

Technical Information

PHYSICAL DATA

Appearance:	Light greenish liquid
Specific gravity (20° C):	1,01
Flash point:	None
pH (conc):	approx. 3
Special risks and safety advice:	None

USAGE AREAS

APPLICATIONS

BIO CONTROL FOT is used in oil storage facilities which have problems due to bacteria colonisation and/or algae in the oil/water interface.

DESCRIPTION

- Effective against bacteria and algae in oil and contaminated water;
- Special surface active component ensures complete coverage over large areas;
- Simple control & monitoring program;
- Easy to use liquid.

DIRECTION FOR USE

Sterilisation of Luboil Systems

After severe contamination, all areas should be cleaned manually to remove sludge and silt. On large engines, cleaning with undiluted UNICLEAN GP of the casing frame followed by opening and thoroughly cleaning the sumps is strongly recommended. This should be followed by flushing of the entire lubricating oil system with a flushing oil containing 500–700 ml of BIO CONTROL FOT for every m³.

Sterilisation of Fuel Storage Tanks

The action of bacteria in fuel during storage is widely misunderstood and its results often thought to be that of stratification of blended fuels due to incompatibility. If bacteria is suspected, water drawn from the fuel storage tank bottoms should be tested and the bacteria count established. If it is above 105/ml, there is a good chance that colonisation has taken place throughout the fuel. In such case treat at 500 - 700 ml of BIO CONTROL FOT for each m³ of fuel.

BIO CONTROL F.O.T.
