

LUBE OIL SEPARATOR CLEANER

Disc Cleaner

Technical Information

PHYSICAL DATA

Appearance:	Light yellow liquid
Specific gravity:	1,273 Kg/l
pH (neat):	1
Solubility in water:	Soluble.

USAGE AREAS

DESCRIPTION

Special formulated blend of surfactants and acids, designed to remove carbonaceous and varnish deposits from lube and fuel oil separator discs.

- Concentrate blend of surfactants
- Completely soluble in water
- Contains no chlorinated hydrocarbons
- Does not attack stainless steel
- Degreases surfaces and machines parts
- Rapid water rinsing
- Easy to use for fast results

APPLICATION

- To clean separator discs from both lube and fuel oil systems.
- Specifically designed for cleaning stainless steel discs and parts.

ADVANTAGES

- Reduces cleaning time.
- Cost-effective.
- Easily diluted, no mixing.
- Easy to use.
- Dissolved deposits do not re-deposit.
- Safer to use.
- Does not harm discs.

LUBE OIL SEPARATOR CLEANER

DIRECTIONS FOR USE – PRODUCT DOSE

It is recommended that the discs be immersed in a dilute solution of LUBE OIL SEPARATOR CLEANER. Depending upon the quantity of deposits, a solution containing one part of LUBE OIL SEPARATOR CLEANER to four to eight parts water should be used. Any suitable metal container (except galvanized) or dip tank can be used to clean the parts. The solution can be used at ambient temperature, but faster cleaning will take place at an elevated temperature of 50°- 60°C (122°-140°F).

Do not immerse bronze or brass distributor support columns in the LUBE OIL SEPARATOR CLEANER solution since corrosion of these materials will likely occur. Remove the stainless steel discs from the support column and place only these stainless steel parts in the LUBE OIL SEPARATOR CLEANER solution. After cleaning has been completed, thoroughly rinse the parts with fresh or tap water.

IMPORTANT NOTICE

While the descriptions, designs, data and information contained herein are presented in good faith and believed to be accurate, this information is provided for your guidance only.
