

POTABLE WATER STABILIZER

Polyphosphates Mix with Stabilising Properties

Technical Information

PHYSICAL DATA

Appearance:	Clear colourless liquid
pH:	8.5 - 9.5
Odour:	None

USAGE AREAS

DESCRIPTION

Uniservice Unisafe POTABLE WATER STABILISER is a combination of polyphosphates having stabilising properties. The product effectively and economically provides scale and corrosion control in potable water and other shipboard once-through water systems. Uniservice Unisafe POTABLE WATER STABILISER is carefully blended to utilise the best properties of each ingredient and can be used in potable water. It meets the requirements of the U.S. Public Health Service and the U.K. Department of Trade and Industry.

ADVANTAGES

- Prevents "Red Water" in ships potable water systems.
- Provides scale and corrosion control in condensers, heaters, coolers, tanks, flash evaporators and other marine equipment.
- Controls corrosion in pipelines and other equipment handling softened or evaporated water.
- Supplied in convenient to use liquid form.
- Effective at temperatures up to 80°C.
- Increase system life and reduces maintenance costs.

APPLICATIONS AND PRODUCT DOSE

Dosage varies between 15-40 mg/l for ordinary water treatment (approximately 0.3-0.8 litre/25 tonnes of water). Dosage may be greater for other applications. Specific recommendations can be obtained from your Uniservice Unisafe representative.

Uniservice Unisafe POTABLE WATER STABILISER is non-corrosive to ordinary metals used in feeding equipment and may be fed with a simple by-pass feeder, available through your Uniservice Unisafe representative. The treatment should be proportioned to maintain the desired dosage.

POTABLE WATER STABILIZER

PACKAGING, HANDLING, FIRST AID AND STORAGE

Uniservice Unisafe POTABLE WATER STABILISER is normally supplied in drums containing 25 litre (approximately 30,8 kg.). Storage temperature should not exceed 40°C.

Uniservice Unisafe POTABLE WATER STABILISER is mildly alkaline and may cause skin irritation on prolonged contact with skin. In case of contact wash skin with plenty of water. If eyes are affected, give immediate washing with clean running water for at least 15 minutes and obtain medical attention. If a portion of the liquid or its strong solution is swallowed give plenty of water or bland fluids e.g. milk and call a doctor. **Warning:** Do not give an unconscious person anything to drink.

IMPORTANT NOTICE
