MARINE FUEL SPECIALTIES
Enhancing your fleet performance

PRODUCT DATA SHEET

Octamar™ ecopower

Special Marine Products

Innova ve mul func onal addi ve engineered to maximize marine dis llate fuel performance and support long-term engine durability

Product Descripti n

Octamar™ ecopower is an advanced multi-functional additive consisting of a combustion improver, an ignition improver and an antifoulant.

Octamar™ ecopower improves fuel economy, overall operating efficiency, atomisation, and fuel combustion. It will also protect against fuel injector fouling and fuel filter plugging.

Typical Propertie

Appearance	Clear amber liquid
Density at 15°C	925 kg/m³
Flash point	≥61 °C

Dosage / Directi ns for Use

The recommended dosage rate of Octamar™ ecopower is 1:3,000 (1 litre per 2.5 tonnes of Marine Distillate Fuel). Alternative dosages may be recommended based on fuel quality or operational conditions.

Innospec personnel are always available to assess your specific problems and advise suitable product(s) and dosage program.

Applicati n

Manually add Octamar™ ecopower directly to the storage or bunker tank before or during each bunkering operation. Alternatively, add the product to the settling tank before or during each filling.

If preferred, an in-line chemical dosing pump may be used.

Storage & Handling on board

Store away from heat, sparks and open flame. Always carefully read the Material Safety Data Sheet before use.

Pack Sizes

Octamar™ ecopower is supplied in non-returnable 25L pails.

Bene ts

- Improves fuel economy, enabling vessels to operate more cost-effectively.
- Optimizes overall operational efficiency, supporting reliable and consistent engine performance.
- Promotes finer fuel atomization and more complete combustion, which helps reduce unburned carbon emissions.
- Protects engine performance by preventing and removing deposits in fuel injectors.
- Minimizes soot and carbon buildup in combustion chambers, exhaust valves, and turbochargers, maintaining engine cleanliness.
- Enhances the oxidation and thermal stability of MGO/MDO fuels containing up to 30% biofuel, supporting longer storage periods without loss of quality.
- Extends maintenance intervals while preserving maximum operational efficiency, reducing downtime and maintenance costs.
- Cleans the engine and fuel system during use, supporting long-term reliability.
- Manufactured in a facility certified to ISO 9001 and ISO 14001 by DNV
- Manufactured in the European Union
